Hi all,

As we begin kick-off meetings this week, I'm sharing the Project Pipeline document (attached). It describes the end-to-end pipeline your teams contribute to, including step descriptions, key concepts, the work plan, and weekly assignments.

This is a draft. I'm sharing it now so you and your supervisors can review it and provide comments — anything unclear, missing, or that could be improved. Your feedback will help us refine it before we finalise.

The document is in Markdown format. For the best reading experience, open it with a Markdown reader or viewer (e.g., the Markdown Preview extension in VS Code, or an online viewer such as markdownlivepreview.com).

Regards,

Marc Torra
